## Seeking to Raise the Consciousness of Humanity One Soul at a Time

One of my biggest goals, even from childhood was to learn how to hold on to joy. There was a secret, at least it seemed a secret to me until I read a book many years ago that opened my eyes. The secret to living a life full of peace, joy, and happiness was not that book, but a best seller I already had in my home; THE HOLY BIBLE! From this point, I was propelled into studying the word of God and all things spiritual that confirmed the bible. Soon I realized that my previous interests all lined up with God's Future plans for me.
